5	Manage ventilated patients	Technical Skills	STRONG	10/10	Skills: Mechanical Ventilation, Ventilator Management. Work Experience: Staff Registered Nurse at Ridgeway Health Level II Trauma Center – 'Managed ventilated patients independently'. Projects: Mechanical Ventilator at Verde Regional Medical Center – 'performed mechanical positioning'. Medical ICU at Lakeshore Hospital – 'continuous ventilator care'.
6	Manage vasoactive-dependent	Technical Skills	STRONG	10/10	Work Experience: Staff Registered Nurse at Ridgeway Health Level II Trauma Center – 'Managed vasoactive-dependent... patients including'.

	patients				Skills: Hemodynamic Monitoring (imp management of vasoactive medicati
7	Perform head-to-toe assessments	Technical Skills	STRONG	8/10	As a Registered Nurse with 6 years o performing head-to-toe assessment fundamental and continuous part of not explicitly stated as a distinct skill 'hourly neurologic assessment' in Ne project.
8	Interpret hemodynamic data	Technical Skills	STRONG	9/10	Skills: Hemodynamic Monitoring. Wor Staff Registered Nurse at Ridgeway H Trauma Center – 'Managed... vasoact patients independently' (requires he interpretation). Projects: Cardiovasc Harborline Medical Center – 'Manage surgery patients with ECMO, IABP, an require advanced hemodynamic inte
9	Titrate vasoactive, sedative, and analgesic infusions	Technical Skills	STRONG	9/10	Skills: Sedation and Delirium Assessr Assessment. Work Experience: Staff Nurse at Ridgeway Health Level II Tra 'Managed... vasoactive-dependent... independently'. This directly implies infusions.
10	Recognize and escalate clinical deterioration	Technical Skills	STRONG	9/10	Work Experience: Staff Registered Nu Health Level II Trauma Center – 'Mem response team'. This role directly inv and escalating deterioration.
11	Initiate and monitor Continuous Renal Replacement Therapy (CRRT)	Technical Skills	STRONG	10/10	Skills: Continuous Renal Replacemen Certifications: Continuous Renal Rep Therapy competency. Work Experien Registered Nurse at Ridgeway Health Center – 'Managed... CRRT patients ir 'Completed unit critical care fellowsh competency validation'. Projects: Me Verde Regional Medical Center – 'per Medical ICU at Lakeshore Memorial H 'Handled high-acuity medical ICU ca

12	Execute sepsis bundle elements	Technical Skills	STRONG	10/10	Skills: Sepsis Bundle Execution. Work Staff Registered Nurse at Ridgeway Hospital Trauma Center – 'Participated in sepsis compliance improvement project'. Prior ICU at Palo Verde Regional Medical Center. 'Managed patients with septic shock
13	Prioritize competing demands in 1:2 patient assignment	Technical Skills	STRONG	8/10	Work Experience: Travel Registered Nurse independent practice after a two-shift. As a travel nurse in high-acuity ICUs, multiple patients and prioritizing demands inherent to the role, especially given practice requirement.
14	Electronic Health Record (EHR) experience	Tooling And Workflow	STRONG	8/10	As a Registered Nurse with 6 years of across multiple hospital systems, EHR given, though no specific EHR system job description states 'Prior EHR experience unit-specific training provided', so given experience is sufficient.

Key strengths to leverage

Extensive and recent adult ICU experience (6 years)

Expertise in CRRT, mechanical ventilation, and vasoactive management

Strong background in Level I/II trauma centers and diverse ICU settings

Gaps to probe in screen

No explicit gaps provided.

CCRN certified and actively pursuing BSN

Experience with advanced modalities like ECMO, IABP, Impella

Recommended probe questions for Registered Nurse – Intensive Care Unit (ICU)

#	Question	Area
Q1	You have extensive experience managing ventilated patients. Can you describe a complex case where you had to make critical decisions regarding ventilator settings or weaning, and what was the outcome?	Ventilator Management
Q2	This role involves a 1:2 patient assignment with high acuity. Tell me about a time you had to prioritize competing demands between two critically ill patients, and how you ensured both received appropriate care.	Prioritization & Workload
Q3	You've worked with advanced modalities like ECMO and IABP. Can you share an experience where your understanding of hemodynamics and these devices directly impacted a patient's outcome?	Advanced Hemodynamics
Q4	The job description mentions initiating and monitoring CRRT. Describe a situation where you encountered a significant issue or complication with a CRRT circuit, and how you troubleshot and resolved it.	CRRT Troubleshooting

Q5	As a travel nurse, you're expected to be fully productive after a two-shift orientation. How do you approach quickly integrating into a new unit, understanding their specific protocols, and building rapport with a new team?	Adaptability & Integration
Q6	You've served as a resource nurse. Can you recall a time when a less experienced colleague came to you with a challenging clinical situation, and how you guided them through it while ensuring patient safety?	Mentorship & Resourcefulness
